

# Same Tree - LeetCode

 [leetcode.com/problems/same-tree](https://leetcode.com/problems/same-tree)

Given two binary trees, write a function to check if they are the same or not.

Two binary trees are considered the same if they are structurally identical and the nodes have the same value.

## Example 1:

**Input:**    1        1  
          / \     / \  
         2 3    2 3  
  
         [1,2,3], [1,2,3]

**Output:** true

## Example 2:

**Input:**    1        1  
          /        \  
         2        2  
  
         [1,2],    [1,null,2]

**Output:** false

## Example 3:

**Input:**    1        1  
          / \     / \  
         2 1    1 2  
  
         [1,2,1], [1,1,2]

**Output:** false
