

Minimum Depth of Binary Tree

 leetcode.com/problems/minimum-depth-of-binary-tree

Given a binary tree, find its minimum depth.

The minimum depth is the number of nodes along the shortest path from the root node down to the nearest leaf node.

Note: A leaf is a node with no children.

Example:

Given binary tree `[3,9,20,null,null,15,7]` ,

```
  3
 / \
9   20
 / \
15  7
```

return its minimum depth = 2.
